## XRP Price Drops Massively After Trade War While Viral Sensation DTX Exchange Holds Strong Before Q2 Listing

**Main Keywords:** XRP Price, Ripple

**Secondary Keywords:** Ripple cryptocurrency, DTX Exchange, Trade War, Crypto trading and cryptocurrency trading

**Article Type:** Dual Comparison

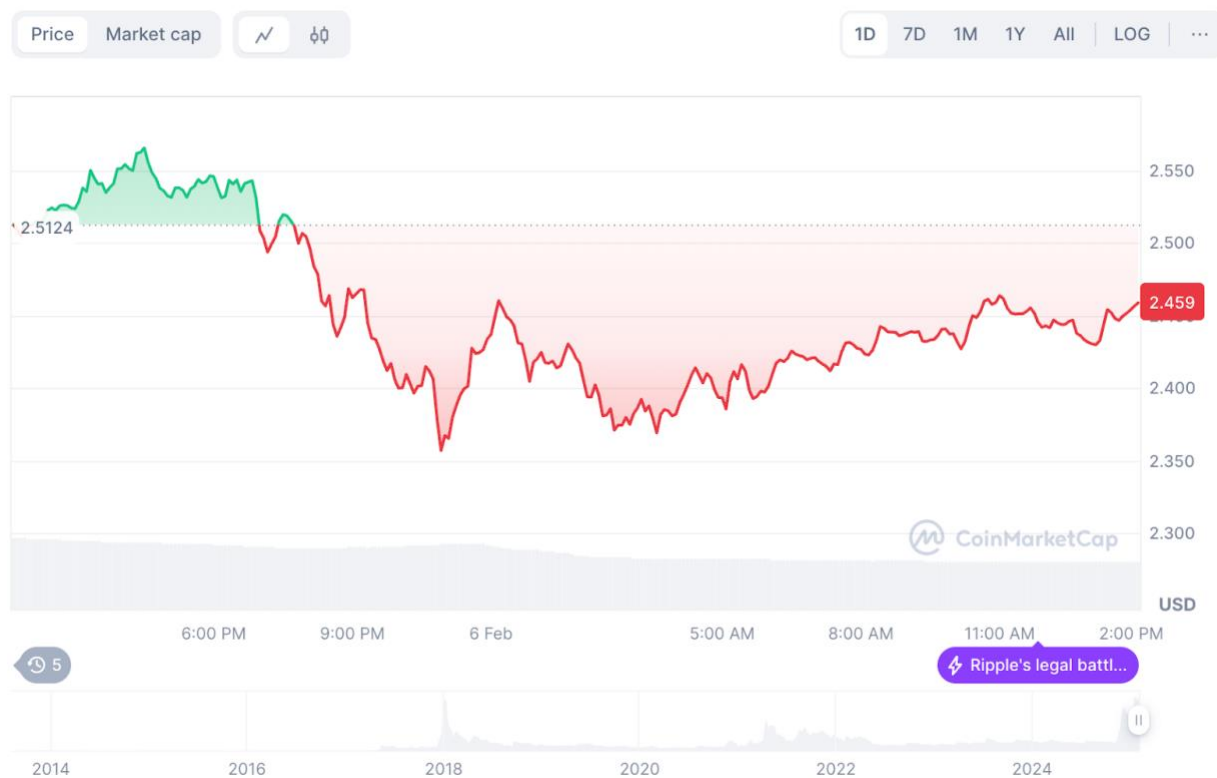

Meta Description: Ripple price faces a massive drop down as the trade war strikes with full force, while DTX Exchange is gaining immense popularity and is anticipating its official Q2 listing.

The Crypto market has faced a brutal decline due to the emerging trade war, resulting in a substantial downfall of cryptocurrencies like XRP, which has dropped down to 28.2% from \$3.07 to \$2.28.

In this recent trade war where Ripple faces a major downfall, the new viral sensation DTX Exchange is surging and remains strong. Furthermore, DTX Exchange stays resilient before its official Q2 listing.

### Colossal Sink in XRP's Price as Trade War Heats Up

The most recent emerging trade tensions have significantly impacted cryptocurrencies, including XRP. The price of ripple cryptocurrency today is \$2.28, which was \$3.07 previously. International trading policies have created this economic uncertainty, resulting in a dramatic downfall for Ripple's purchasers.

Investors of XRP are extremely concerned as it holds a major role in cross-border payments. Despite the resilient ripple technology, that powers XRP, its price is not taken under control, and it is decreasing. By analyzing the current situation it is difficult to predict whether XRP will recover the encountered loss.
